StudentHub Portal

Project Description

StudentHub Portal is a simple website made using HTML and CSS.

It helps students access different sections like Timetable, Attendance, Profile, Courses, Notice Board, and Contact from one place.

This project was created as part of the Web Development and Frameworks (WDF) course.

Features

- Home Page
- Timetable
- Attendance
- About Us
- Profile
- Notice Board
- Feedback
- Contact
- Admin
- Login
- Courses

Technologies Used

- HTML5
- CSS3
- Visual Studio Code
- Git & GitHub

How to Run

1. Download the project.
2. Open the project folder.
3. Open `index.html` in any web browser.

Requirement Analysis

Functional Requirements

The system should allow users to:

- View the Home page.
- View the Timetable.
- Check Attendance.
- View available Courses.
- View their Profile.
- Read notices on the Notice Board.
- Read information on the About Us page.
- Send feedback through the Feedback page.
- View Contact information.
- Access the Login page.
- Access the Admin page.

Non-Functional Requirements

- Simple and easy to use.
- Clean and attractive interface.
- Easy navigation between pages.
- Fast loading webpages.
- Compatible with modern web browsers.
